Thanks, Sara and Greg. Feel free to send in what you have collected now and you may send in the remaining 5 to 6 samples after you collect them. Please continue to use the FY 17 project number – R17R01.

Hi Susan,

Greg and I decided to continue sampling until the end of the field activities, which will continue roughly through November. As of now, DTSC has roughly 15-20 samples ready to ship to the EPA lab, and will collect 5-6 more in the coming weeks (1/week). We can do whatever's easiest for the lab as far as timing of shipping samples—would it be easiest to ship one batch (how many samples is that?) now, and the rest together later? Please advise.

Many thanks,

Sara

Hello,

I do have enough samples for another batch. We are coming near the end of the field activities. We have maybe another 5 or 6 weeks. For the sake of planning and ease, Sara and I should decide if now is a good time to cut off sampling rather than trying to collect all the way until the very end. DTSC continues to oversee sampling but am open to considering what I have to ship as the final samples.

I can send samples anytime from next week on.

Thanks  
Greg

Hi Sara – Checking in on the Riverside Ag Park soil samples for the Region 9 Lab (project no. R17R01). Do you still expect to send us samples within the next couple of weeks?

Thanks for your time.

Hi Sara,

No hard rules with the lab project numbers and the fiscal year end. If you have a few that linger into October, we can still take them under R17R01. If you believe you will have continued regular sampling into FY18, we can provide a new project number.

Hi Susan,

Our colleagues at DTSC have continued to collect PCB soil samples under #R17R01 for analysis by EPA's lab. These samples will be ready for shipment & analysis in September. I thought I'd check with you: can DTSC continue to use the same number(#R17R01), and is there any deadline for DTSC to get the lab the samples because of the end of the fiscal year September 30 or for any other reason?

Many thanks,

Sara

Hi Susan,

Our DTSC colleagues are preparing to send about 21 samples to the lab next week under R17R01, for PCB Aroclor analysis – just giving you a heads up. Please see below.

Thank you!

Sara

Hello,  
As we have discussed, I have amassed enough samples for shipment (21) to your lab next week (I will send email to [R9RSCC@epa.gov](mailto:R9RSCC@epa.gov) on the day I ship). I wanted to confirm that that the Case number #R17R01 is still ok to use for reference.

Thanks  
Greg
